Cancel claims 28-33, 37, and 38.

Add the following new claims:

40. A jet pump for controlling the flow of a first fluid stream being drawn

therethrough by action of a flow of a second fluid stream, said jet pump comprising:

- 5  
4/17/91  
a/
- i) a first fluid conduit adapted to conduct said first fluid stream;
  - 10 ii) a second fluid conduit adapted to conduct said second fluid stream, said second fluid stream in fluid communication with said first fluid stream at an inner section, said flow to said first fluid stream through said first fluid conduit being dependent upon the flow of said second fluid stream through second fluid conduit;
  - 15 iii) at least one bypass conduit adapted to conduct a bypass flow of said second fluid stream around said inner section, said at least one bypass conduit containing a movable body moved so as to control flow of said fluid therethrough and within, the outflow of said jet pump is connected to the inflow of a pump and the outflow of said pump is connected to the inflow of said jet pump.

41. A jet pump according to claim 40 wherein said first fluid conduit, said second fluid conduit, said bypass conduit, said inner section and said movable body are combined into a single structure.

42. A jet pump according to claim 41 wherein said movable body is a flow control valve.

43. A jet pump according to claim 41 wherein said inner section is a venturi.
